EXPERT ADVICE

Mr. Sandeep Jain
Founder & CEO – GeeksforGeeks

He started this Journey with just one thought- every geek should have access to a never ending range of academic resources and with a lot of hardwork and determination, GeeksforGeeks was born.

Through this platform, he has successfully enriched the minds of students with knowledge which has led to a boost in their careers. But most importantly, GeeksforGeeks will always help students stay in touch with their Geeky side!

“ I understand that many students who come to us are either fans of the sciences or have been pushed into this field by their parents.

And I just want you to know that no matter where life takes you, we at GeeksforGeeks hope to have made this journey easier for you. ”

COURSE OVERVIEW

This course is specifically designed to help any student who is inclined towards Computer science & wants to have a strong foundation regarding the same. With the help of this course such students and working professionals can land their dream job. Each and everything is covered in the form of video lectures so that it becomes easier to understand.

Be it a product-based company, service-based, or a startup. If you are willing to work in the IT sector & preparing for the same, there is nothing better than this course!

VIEW DETAILED SYLLABUS

There is an **additional feature** of adding **24X7 Doubt Assistance** too!
(Add Doubt Assistance @INR 1,499)

The **doubt assistance** would be available **24X7** in the form of a discussion portal, where there will be mentors and TA's to help you out with any problem you face for a complete year. You can also get your doubts resolved on Google Meet.

Course Completion Certificate

2 Year Validity

PROJECTS

01 Sudoku Solver

Program to solve a Sudoku puzzle by filling the empty cells.

02 Shortest Path Finder

The problem of finding the shortest path between two intersections on a road map may be modeled as a special case of the shortest path problem in graphs, where the vertices correspond to intersections and the edges correspond to road segments, each weighted by the length of the segment.

03 Tic Tac Toe

A game in which two players alternately put Xs and Os in compartments of a figure formed by two vertical lines crossing two horizontal lines and each tries to get a row of three Xs or three Os before the opponent does.

04 N Queens Visualizer

Visualization of solving the N-Queens puzzle using recursive algorithm. The N-Queens puzzle is the problem of placing N chess queens on an N×N chessboard so that no two queens threaten each other.

Success Stories

Job Offers

**Pushp Sood**

Placed in

GeeksforGeeks gave me a greater understanding of what the classroom taught me! Right from addressing all my queries even during the odd hours of the day to allowing me access to a plethora of valuable resources, everything was taken care of by GFG impeccably. I cannot thank the entire GFG squad enough for helping me crack Amazon on my very first attempt!

**Mrigank Singh**

Placed in

I joined this course and got placed in Airtel as the Software Engineer. GeeksforGeeks provided a step by step structured path to me, to solve coding problems. The best things is that the course is taught in a well structured manner and there are a lot of questions to practice. I have learned all the concepts very well and specially Algorithms in very less time. I am really thankful to GeeksforGeeks.

**Shubhankar Tripathi**

Placed in

In my 3rd year, I struggled to get my online round cleared in my dream companies. I was disheartened & demotivated so much. Somehow I got an internship but had zero satisfaction. Although I was using gfg from my 1st year but somewhere I felt that my concepts needed to be structured in a proper manner. During January 2020 I come across this program by gfg & desperately joined this without any further thinking. Due to Sandeep sir & all other faculties in GfG I landed to my dream job. Thanks gfg for being with me through all thick & thins.

**kashish gupta**

Placed at

The CIP course is a great mixture of 4 years of my graduation. I got comprehensive content in this course with theory and awesome practice questions. It not only covers all important topics but also, Sandeep Sir even each question's optimized approach, their variations are covered too. This helped me a lot in interviews, as we know practice makes a man perfect. I would like to say for GFG a proper study and consistent practice can definitely make you interview ready.

Success Stories

Internships

**Prayag Bhatt**

Placed as Intern at

amazon

From the fear of getting rejected from so 5-6 companies and the enjoyment of getting (Finally) placed, I would like to thank you for the great team of GFG. From Starting of 2021, I was unsure from which platform I should learn, or learn free from YouTube or other sites. Then after considering all the possibilities, I choose the GFG CIP course. If you have 5-6 months left before your interview and you don't have exposure to all the DSA Topics, you should think about buying this course. No one wants to reject from Amazon because of not knowing the simple TRIE Data structure (True Story one of my friends was asked to implement Trie). So I prepared for 5 months rigorously and solved almost all the problems and give the contests. But the main point I want to tell you all is this course will not give you an offer unless you do not complete it. So Prepare Hard and Enjoy Hard if you invest here.

**Mohan**

Placed as Intern at

ZOHO

My college senior suggested this course for my placements. After joining this course, I learnt a lot about data structures and algorithms and in detail. This course helped me to solve problems with efficient space and time complexity. I am an ECE student so I was not aware of subjects like OS, DBMS and computer networks. This course made me learn those stuff easily.

**Aditya Kumar**

Placed as Intern at

DELL

Complete Interview preparation is an awesome course. It was a wholesome package that helped with my overall skill refinement. This course cleared all my basic concepts and helped me to further build on them. The practice problems are very nicely posed, I solved them regularly and learnt a lot in the process. I will definitely recommend this course to my friends. Thanks to GFG, with this course, I have got an internship opportunity at Dell.

QUESTION & ANSWER

I am from a non-CS background, with a very basic knowledge of programming. I am neither aware of the subjects asked in the interview nor do I have any friends with CS background. Can this course help me? If yes, then how

This course comprises the subjects that are covered in the curriculum of a CS student that are Operating System, Database Management System, Computer Network, Object Oriented Analysis & Design. This course will help you by providing you with premium lectures, theory, practice tracks etc to ensure unidirectional, smooth & easy learning. In this course, we have users from different backgrounds like BCA, MCA, B.Sc (CS), and other B.Tech branches like ECE/ EEE/Chemical/ Mechanical/Civil, etc who are aiming for IT-sector companies.

When is the right time to enroll in the course? Should I wait and join this course in my pre-final year?

This course is suitable for any student, who is aiming for IT-sector companies, be it in the first year or in the final year. We suggest our students enroll in this course from 1st year itself, as it covers everything that will be covered during their B.Tech. Not only it will help the student to prepare for their Internships/Placements but also, for their regular exams that are conducted in their college.

This course is inclusive of weekly plans for each & every year (first-final year student) so that each student can cover at its own pace & can also devote their time to the project work as well.

Is there any Mock Test available in the course?

To help our students in every possible way so that they ace the interview of their dream company, we provide company-wise questions. Also, Mock-test is available in the form of contests in the course itself.

What is the difference between the DSA-SP course & the CIP course?

The DSA-SP course covers the basic to advanced content of DSA. While Complete Interview Preparation Course covers DSA, Additional topics of DSA that aren't covered in the DSA SP course, Not only this but also core subjects like OS DBMS, OOPS concept, and much more. Hence CIP is the complete package for Interview Preparations.

How does Doubt Support work?

There is a discussion forum integrated on the dashboard under each video with problems. You can simply comment and ask your doubts there. Almost all doubts are instantly resolved by course mentors/TA's. There is also a separate discussion forum available where you can simply comment for any theoretical doubt/any other course-related query. Moreover, you can get your doubts resolved on Google Meet as well.

What is the difference between free courses/content available and the paid ones?

Free courses/content available on GeeksforGeeks is covered in a theoretical format. If students require more help & want to opt for video lectures then we suggest them to go for the paid courses as each & everything is covered in the form of video lectures by Mr. Sandeep Jain (CEO, GeeksforGeeks) & Industry Experts.

There are premium practice problems available in the course that are available in Company-wise (Tier 1-3) format/Level (easy-moderate-advanced) format.

Details about the price, validity of the course.

The course is available in two forms: Complete Interview Preparation priced at INR 6,999. With 24X7 Doubt Assistance priced at INR 1,499 extra that is (INR 6,999 + INR 1,499). The course validity is 2 Years.

I have been working in a non-tech profile for the last few years, is this course a good choice for me?

If you are someone who is looking forward to switching to a Tech profile or a Tech company, then yes this can help you with the switch. Even if you are new to the tech world, this course will help you give the best start and explore each and everything covered here is beginner friendly and will take you up to the advanced level.

What is the checklist that I need for my Interview Preparation?

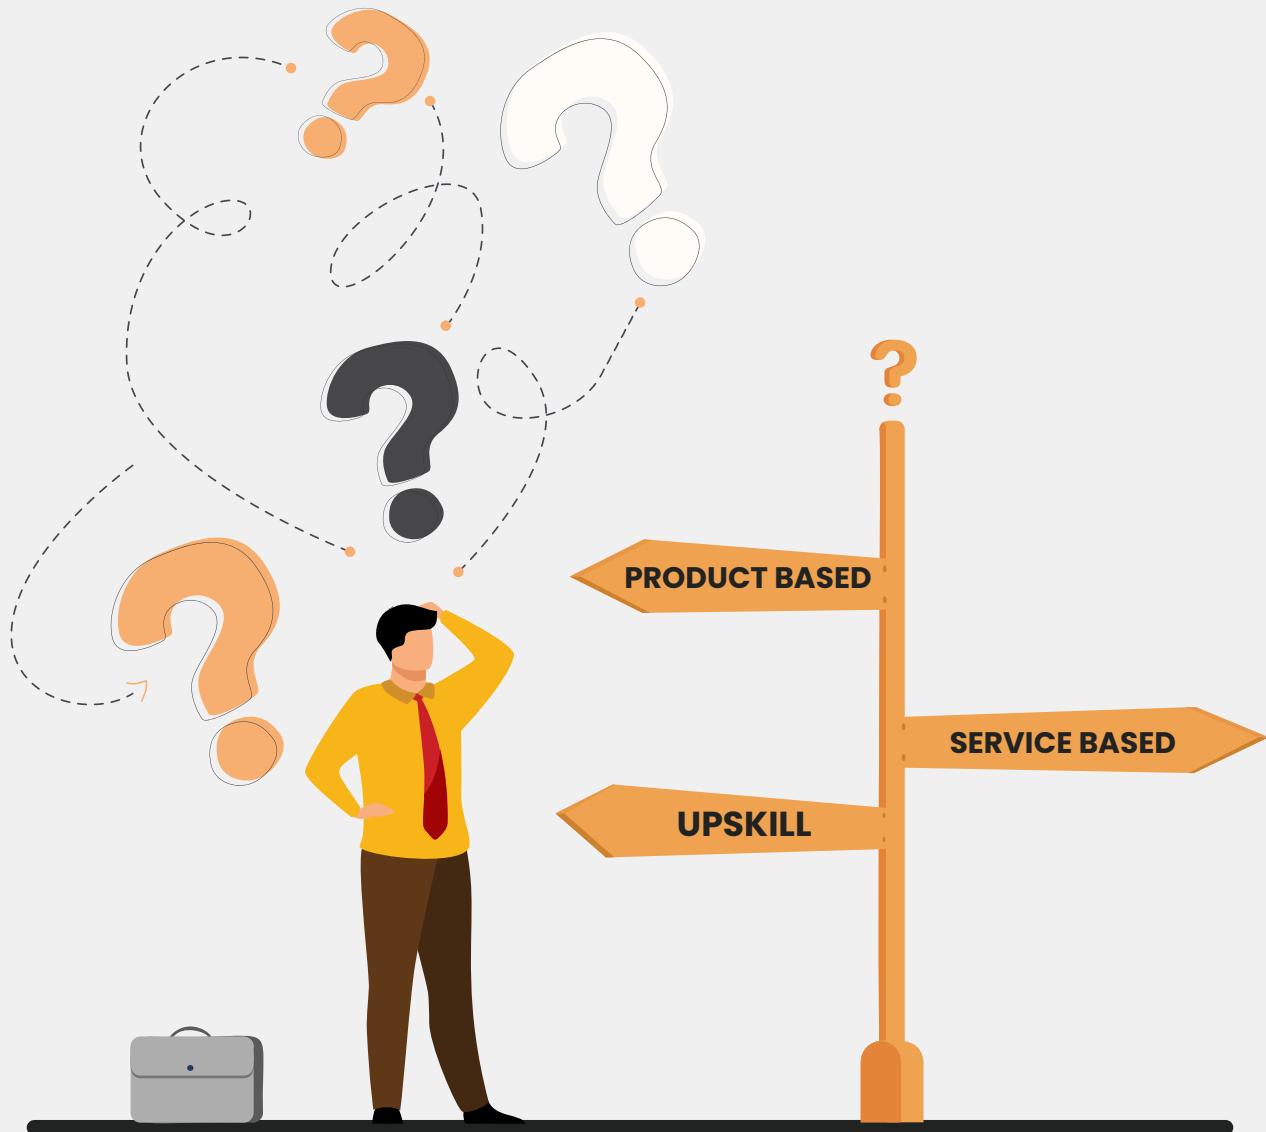

- Programming languages (C++, JAVA)
- Libraries (C++ STL/JAVA Collection)
- Data Structures & Algorithms
- CS Core subjects (OS, DBMS, CN)
- Object Oriented analysis & design
- Aptitude & Reasoning
- Projects
- Mock Tests

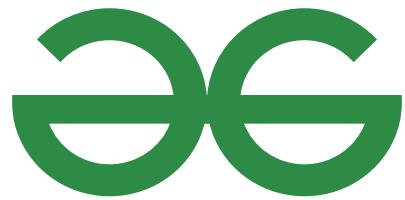

Still unsure about course?
