EXPERT ADVICE

Mr. Sandeep Jain
Founder & CEO - GeeksforGeeks

He started this Journey with just one thought- every geek should have access to a never ending range of academic resources and with a lot of hardwork and determination, GeeksforGeeks was born.

Through this platform, he has successfully enriched the minds of students with knowledge which has led to a boost in their careers. But most importantly, GeeksforGeeks will always help students stay in touch with their Geeky side!

“ I understand that many students who come to us are either fans of the sciences or have been pushed into this field by their parents.

And I just want you to know that no matter where life takes you, we at GeeksforGeeks hope to have made this journey easier for you. ”

COURSE OVERVIEW

This course will help you bridge the gap between software development and operations and gain hands-on experience through projects. It is especially designed for those who want to enter the world of DevOps or who want to upgrade their skills.

VIEW DETAILED SYLLABUS

REVIEWS

Shivam Singh

I would recommend this course to anyone who is interested in pursuing a career in the field of DevOps. This course helped me in building a strong foundation which eventually led me to my dream company.

Rashmi Malhotra

The entire content of this course is very well organized. I got sufficient practical exposure through the live sessions & projects.

Kanika Sahani

For someone who really wants to pursue a career in the field of DevOps, it is worth opting for this course. Highly recommend it!

Aman Mishra

It was a really good course, everything is well-organized and the concepts are well taught. I would recommend this course to anyone who is interested in learning devops along with gaining practical experience.

Rahul Malhotra

A very well-structured and well-balanced course content. Being a beginner, I found the teaching method of the course very helpful!

QUESTION & ANSWER

I have very basic knowledge about devops. Will I be able to cope up with this course?

Basic knowledge of DevOps is more than sufficient to initiate this course. This Live course covers the fundamental concepts before progressing to more advanced topics.

How will these classes be conducted?

It will be an online live (Live Stream) class, so you can attend this class from any geographical location. It will be an interactive live session, where you can ask your doubts to the instructor (similar to our online classroom program). You just need to have working internet and a PC/Laptop.

What is the size of a batch?

The planned batch size is 30-40

What if I miss out on any Live-session? How will I cover up?

To help out the students in every possible way, we provide the recordings of the Live lectures that are conducted. If a student misses out on any lecture, he/she can find the recordings and can go through them. In case of any further queries, they can be resolved with the help of the mentor. The recordings are uploaded in the next 48 hours of the class and are available to students for 1 year post the completion of the course.

How does Doubt Support work?

There are two ways in which a student can get their doubts resolved:

1. This is a Live course, you can directly interact with the mentor during the class and get your doubts resolved.

2. There is a discussion forum integrated on the dashboard under each video & with problems. You can simply comment & ask your doubts there. Almost all doubts are instantly resolved by course mentors/TA's. Also, there is a separate discussion forum available where you can simply comment for any other doubt or course-related query.
