# EXPERT ADVICE

## Mr. Sandeep Jain

Founder & CEO - GeeksforGeeks

He started this Journey with just one thought- every geek should have access to a never ending range of academic resources and with a lot of hardwork and determination, GeeksforGeeks was born.

Through this platform, he has successfully enriched the minds of students with knowledge which has led to a boost in their careers. But most importantly, GeeksforGeeks will always help students stay in touch with their Geeky side!

I understand that many students who come to us are either fans of the sciences or have been pushed into this field by their parents.

And I just want you to know that no matter where life takes you, we at GeeksforGeeks hope to have made this journey easier for you.

”

# COURSE OVERVIEW

In this Live course, you'll learn the basics of Git, Front End Web Development, JavaScript and then will further move on to learning the top two libraries- React JS and Node JS. You will also be creating an industry-ready single-page web application. Towards the end, you'll have completed a product called Leadstagram/ Mini Facebook. You'll also learn how to deploy and maintain an application with the complete DevOps workflow. We will try out multiple deployment methods such as AWS, Netlify, GitHub Pages, etc. and also look into various CI / CD Pipelines like Travis-CI & GitHub actions. You can attend this class from anywhere and ask your doubts without hesitation!

FSRNL Classes are scheduled every Saturday & Sunday.

# Success Stories

## Shivam Kaushik

Associate Consultant &  
Implementation Engineer at

GeeksforGeeks is there in my life since my college journey began, it has helped me in the placements as well as in my college studies. From learning the very first programming language to getting placed in one of my favorite companies, GeeksforGeeks has played a vital role in shaping my career. I was interested in technical roles from the very start and later came across the GeeksforGeeks portal. I have taken two courses from GFG, namely, Full Stack Development with React & Node JS and Data Structures and Algorithms. The projects that I built were of high level, but with the DSA course, it was possible to complete my project without any difficulty. Not only this, but these courses helped me to excel in the coding and technical interview rounds. My instructor was very kind and helpful throughout the entire course. I would recommend these courses to everyone who is preparing for their placements and those looking forward to learning new skills.

## Tejas Pradhan

Internship at

Deutsche Bank 

This course was packed with amazing and well-organised content! The project-based approach of this course made it even better to understand concepts faster. The instructor is really good and knowledgeable. After this course, I was able to master the MERN stack and learn advanced concepts related to web development. I have built a strong profile with multiple projects. I also delved deeper into these technologies which in turn helped me to secure an internship offer at Deutsche Bank.

# Success Stories

**Sayan**

Placed as a  
Senior Software Engineer at

The course was really awesome. Taking these classes over the weekends I have been able to dive into the field of full-stack development efficiently. The mentor really introduced us to all the concepts that we need to know well to become a full-stack developer. Developing projects on my own strengthened my knowledge and gave me confidence with APIs and React components. The ability to implement REST APIs was a plus point in one of the interviews, I feel. The best thing about this course in my opinion is the hands-on approach which, for me, is the best way to learn anything.

**Shahiaskand**

Placed as a  
Jr. Software Engineer at

**BLUUMBRELLA**

This course helped me in getting brief knowledge about node js and React due to which I have upgraded my technical skills for development. Not only that with the help of this course I was able to get more job offers from IT companies. The course teaching style was spot on and I was able to grasp more than enough to become a decent node js and react developer.

# QUESTION & ANSWER

I have very basic knowledge of HTML/CSS. I am interested in Full Stack Development. Will I be able to cope up with the course?

Basic knowledge of HTML/CSS is more than sufficient to initiate this course. This is a Live Course, you will get to have Project-based learning providing not only conceptual knowledge but also hands-on experience at the same time.

How does Doubt support Work?

There are 2 ways in which student can get their doubts resolved:

1. During the weekend live classes, you can directly ask doubts from the mentor.
2. There is an inbuilt Doubt Support in the course. You can simply comment & ask your doubts there. Furthermore, if your doubts are still not resolved, the mentor would be connecting with you over Google Meet to resolve your doubts.

What if I miss out on any Live-session? How will I cover up?

To help out the students in every possible way, we provide the recordings of the Live lectures that are conducted. If a student misses out on any lecture, he/she can find the recordings and can go through them. In case of any further queries, they can be resolved with the help of the mentor. The recordings are uploaded in the next 48 hours of the class and are available to students for a duration of 1 year post the completion of the course.

Is this course suitable for a student/working professional?

This course is suitable for both students and working professionals who are interested in Full-Stack Development and want to gain some hands-on experience. Any working professional who has basic knowledge of the technology and wants to excel in the field can opt this course. Any student who is in his/her pre-final/final year preparing for placements and wants to work on a project side by side can go for this course.

Are projects important for Resume? Will I be able to add the project made in this course to my resume?

Projects do play an important role to showcase that a candidate not only has conceptual knowledge but also the hands on experience on the technology which is quite beneficial in bagging out great opportunities. This is a Live course, candidates will be making the projects under the guidance of the mentor. These projects can be easily showcased in their respective resumes.
