EXPERT ADVICE

Mr. Sandeep Jain

Founder & CEO - GeeksforGeeks

He started this Journey with just one thought- every geek should have access to a never ending range of academic resources and with a lot of hardwork and determination, GeeksforGeeks was born.

Through this platform, he has successfully enriched the minds of students with knowledge which has led to a boost in their careers. But most importantly, GeeksforGeeks will always help students stay in touch with their Geeky side!

“ I understand that many students who come to us are either fans of the sciences or have been pushed into this field by their parents.

And I just want you to know that no matter where life takes you, we at GeeksforGeeks hope to have made this journey easier for you. ”

COURSE OVERVIEW

Course Duration: 8 Weeks

AWS Cloud Practitioner Certification Course equips participants with essential AWS knowledge, starting from foundational concepts to advanced topics in security, stability, and networking.

Whether you're new to cloud technology or aiming to solidify your foundational knowledge, this course is designed to equip you with the skills and insights necessary for the AWS Cloud Practitioner certification.

SUCCESS STORIES

**Nidhi Jain**

Placed in

I joined GeeksforGeeks Offline Course. It is by far one of the best courses for DS & Algo that I have witnessed. It focused on concept building & most important of all the classes not only helped me understand things better but the team also helped me boost my confidence & guided me with the perfect set of study material from the vast ocean that is available online. This classroom program helped me code better and was very useful during my interview.

**Raman Tayal**

Placed in

as a SDE Intern

I am a college student after learning Data Structures and Algorithms I wanted to learn some basic development aspects, that was a reason I joined this course after researching many websites finally found GFG Backend Development. In this course, I learned about Java Backend Development from very basics to a really good level. Mentor had a good experience in this field and helped where I was stuck. It was worth taking this course

**Shail**

Placed in

as a Software Engineer

Thank you so much, Sandeep to provide us with such a beautiful platform like GFG. The way you explained DSA topics actually helped me to learn complex algorithms because of this course, I was able to grasp a complete understanding of data structure I bought a Master System design course on your platform, which helped me get a broad vision of the system. I was able to crack all interview rounds of top companies including Amazon, Flipkart, and Walmart. I am looking forward to contributing back to the GFG community

**Siddharth Sharma**

Placed in

as a System Engineer

My experience with this course was really great. I bought this course because of its well-curated content and would recommend it to everyone. It helped me in my overall skill enhancement and set a pathway to get my dream job as a System Engineer in Infosys LTD. Having prior knowledge of java programming language was an added advantage and helped me in grasping the advanced concepts easily.
