Geek Shots

Parag Agrawal, the newly appointed CEO of Twitter, joins the cohort list of Indian-origin tech CEOs who are changing the world one step at a time! 'Agarwal Ji Ka Beta' is the new 'Sharma Ji Ka Beta'.

India is working to develop 6G technology with the aim to launch it by early 2024. The days of giving excuse related to 'Bad Network' are soon to be over!

Zoom is now available with attendance, polling & much more! They are making things tougher for students all over the world to skip online classes.

No more regretting sending a WhatsApp message to the wrong person, because the meta-owned company is working on extending the time limit for the 'delete for everyone' feature.

"Is Industry Ko Hua Kya, Har Jagah bs Meta, Meta", after Facebook (now Meta), **Microsoft to create their own version of the metaverse.** They are planning to launch this in the first half of 2022.

From marketplace to transport, Whatsapp has got everything you need! Uber and WhatsApp announced a partnership that will allow people to book a ride via the app itself.

नमस्ते LinkedIn. To widen the range of job opportunities for everyone, LinkedIn announced the availability of Hindi on their platform!

“Thapad Se Darr Nahi Lagta sahab Crypto Ke Bill Se Lagta Hai”, but the fear is almost over. The proposed cryptocurrency bill has suggested regulation of cryptocurrency rather than banning it, according to a Cabinet note!

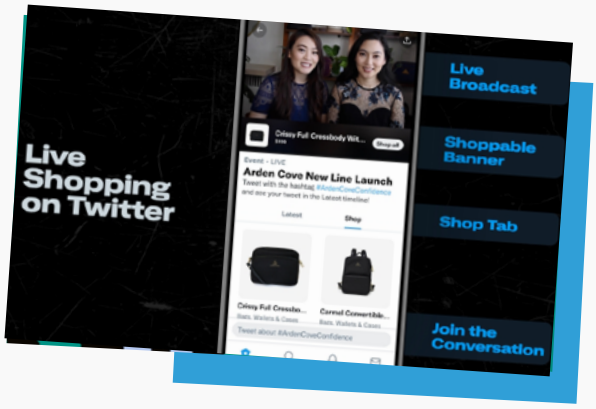

In the race of wearable devices, there is a new entry, Google! After wireless headphones and smartphones, Google is finally making their own in-house smartwatch that’s set to launch in 2022.

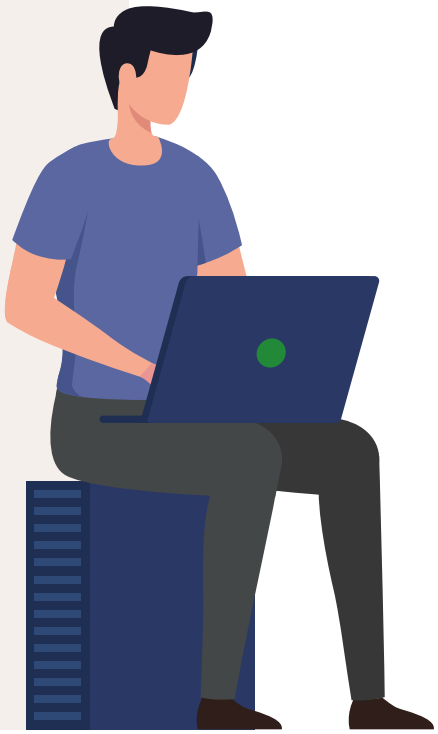

Tesla is all ready for its launch in India in early 2022 because its superchargers are already spotted in certain parts of India. It’s time to put your detective glasses on and spot the superchargers!

Guess which social media network is going to combine shopping & live stream of videos, it’s Twitter! This is a huge jump for Twitter from 280 characters to online shopping.

Through The CEO's Eyes. Q&A

Mr. Juzer Dhuliawala

Bitkraft Technologies (Co-founder)

1) What exactly is the work of Bitkraft Technologies?

Bitkraft is a bespoke software engineering consultancy focused on mobile apps, enterprise applications, and technology skill-sourcing, with an extraordinary track record.

2) What is the hardest part of your job?

Keeping a steady stream of high-quality employees in the firm.

3) How can a person select the right path for their career in today's world?

Knowing what a person enjoys doing will instantly lead him or her along the appropriate professional route.

4) If not into IT, what profession would you go for?

Manufacturing of any type of end-user product that is used on a regular basis.

5) When hiring a new employee what are the qualities you look for?

Logical abilities, an openness to addressing challenges, and a willingness to learn and work on technologies with which a candidate has not previously worked are all desirable qualities.

6) Recently Bitkraft Technologies partnered with GeeksforGeeks to fulfill their hiring needs, can you share something about it?

To be honest, our experience with GeeksforGeeks was fantastic and quite beneficial. We were able to employ two applicants from them in less than a month. Their team's follow-up with the employer and the applicant is outstanding. Their group has consistently upheld us and helped when we stalled out in a cycle.
