JOB-A-THON

A MONTHLY HIRING CHALLENGE

Connecting recruiters
with the best talent

GeeksforGeeks is a globally recognized topmost Computer Science as well as interview preparation portal for the software industry. The platform is designed for students and working professionals to refine their coding skills, upskill in their respective fields, find jobs and even prepare for coding rounds of job interviews. Users are also welcome to contribute write-ups in the field of Computer Science.

Where we're at

500+

campus ambassadors

5500+

students placed in tech giants

Vision:

There are recruiters looking for talent, and there are industry-ready candidates looking for jobs. We, as a platform, help bridge the gap between the two of them.

We have partnered with tech giants like Amazon, Uber, Ola, Paytm and a lot more to help candidates with the best of opportunities all at one place.

**Why choose
Job-a-Thon?**

**Why not hire the
conventional way?**

Well, have a look!

Hurdles in the conventional hiring process

Competition:

High demand for top talent leads to intense competition among tech companies.

Availability of talent:

Finding talent with the desired skills, experience and education can be challenging.

Low test attempt ratio:

The assignments and tests prepared for the mass, conventional hiring have low attempts ratio, hence giving incorrect results.

Follow ups:

The process of following up during the conventional hiring process is especially laborious and burdensome.

Technical assessments:

Assessing technical skills and abilities can be difficult and time-consuming, especially in areas with rapidly evolving technology.

Resume screening:

You can't trust the resume's accuracy, nor your own judgement when screening them.

All about **Job-a-Thon**

Job-a-Thon is a 2.5 hour hiring challenge organised on the **21st of every month**. It is targeted towards hiring the best candidates, be it interns, freshers, or experienced.

It eliminates the need for organisations to go through the tedious process of multiple rounds of filtering and hiring.

The hiring challenge is curated by industry experts and consists of the following sections:

3 DSA coding problems - 100 marks

5 MCQ on Programming Logic -25 marks

5 MCQ on Logical Reasoning - 25 marks

5 MCQ on Quantitative Aptitude - 25 marks

Advantages

- ✓ *Large pool of talented candidates*
- ✓ *Streamlined hiring process*
- ✓ *Better ranking of candidates based on problem solving skills*
- ✓ *Assistance from GeeksforGeeks team*
- ✓ *Increased brand visibility*
- ✓ *Networking and collab opportunities*
